This is a good game, besides the fact

#1 that if I screw up my click I lose, because i'm a damn millimeter off of it and the cursor is hard to pin point sometimes.  
#2 I can't customize my options aka i'd like to be able to hit tab or something to switch so I don't need to worry about problem in #1  
#3 WHY THE HELL DO YOU HAVE TO RESTART IF YOU DIDN'T LOSE (To save the gallery) that is actually dumb  
#4 SAVE How to basically take care of everything and make me less frustrated, after I get to day 4V5 nine times and lose because of #1

There needs to be new updates, like it's good, but it just has stupid holes.

So I don't recommend this game until they "fix" this thing.. I thought I delated something by mistake, but unfortunately, no... there is NO SAITO DLC. YoY

I love Hakuoki, don't get me wrong... but still, this is sad, when You can get ALL DLC ...excludig Your fav character.... There is a small game that convinced me with his idea to play, because i'm a indie gamedesigner.

Unfortunately, the game is not enjoyable, and apart from the bad Humor, the game distorts even more the idea of a real indie developer, instead of making reasonable fun of it.

I stopped at the ♥♥♥♥ing mini-games because they are too terrible, even as a joke.. Awesome mix of Visual Novel and RPG. Hilarious dialog and characters. Definitely worth a play!. 10 waves, 1level, about 5 minutes gameplay. What's going on?

Notwithstanding, I liked the radial menu and the ability to place barricades - just give me some content. I would feel cheesed off if this was a Demo!!. Oh boy , where should i start from?

First of all - there are no other settings beside Music and FX volume and FX volume is turned off by default. The menu music is mainly consisted in 2 house-ish tracks, obviously cut-off of a random set with bad quality. I don't even want to talk about the controlls and the overal in-game experience!

Would not recommend!

1.5/10. It's pretty good

---

This game has no redeeming qualities as of the writing of this review. There is no interface, and you are dropped into a hastily made map where zombies once in a while attack you.

This is someone's for fun project, and not a real game.

There are plenty of real games on Steam for a similar price.

Do. Not. Buy.. The Game looks very good for an Indie early Access Game and has a really good Atmosphere in the game!!! I really like the small Puzzles and Messages you find while Playing, telling you the Story what happened. Moreover I really like the Concept of the Game that everything is changing in the House(Walls and Furniture) giving the Game a variety!!!

Still there are some things in the Game that have to be changed. For example the Mouse sensitivity is extreme at the beginning. So before you start you have to change the setting to be able to play the Game. Moreover I had the bug/Problem that when I changed my settings, my Mouse Froze and I couldn't move the mouse without restarting the Game.

All in all the Game is a really good early access horror Game: 9/10

If you want to watch something about the Game, I started a walkthrough:

<https://www.youtube.com/watch?v=SQWvrjDIRE0>. I hate to give this a negative review as it is a good first attempt made by one individual. However, this is very flawed and definitely not worth \$7. I think \$1-\$2 is fair at most. It is only about 2 hours long if you go through and explore everything/get all achievements.

The biggest issue is with the writing - I understand that they are not using their native language, but editing is key, especially when the story is the meat of your game. Someone really needed to go through this and help the writer. There are also a lot of plot holes, although the story itself is fairly entertaining and interesting.

Another large issue - if you are hard of hearing or deaf, you will have a very hard time with some of the annoying puzzles. One in particular relies on a quiet sound and was especially frustrating for me.

Overall, keep an eye on the developer in the future, but only grab this one if you can get it cheap.. Grigor and Igor are the sweetest little cuties and I love them

I appreciate and love the birds and all they do

The waxlings are what is good and pure about this world

Stein could murder me and I'd still love and cherish it

I smack ghosts and patients with a fly swatter

Altho I wish Stein would stop sassing me about going back to the main menu. A great game,. After just beating chapter one, I can say that this is a fun, strange, and nice little point and click, I would recommend it :3. This CoG product is hindered by mediocre writing. It doesn't seem like the author doesn't know how to write, so much as the product is just very high and low. The good parts are very good. The bad parts are cringe-inducing. I can't hate it, but I also can't recommend it. Whoever wrote this will probably write something awesome someday.
